

# CUSTOM30 TRAINING

## employee training

### CUSTOM30 TRAINING

Committed to helping customers protect their 505/CTI 2500 Series PLC investments, FasTrak is pleased to introduce Custom30 training. Custom30 is a new, cost-effective training option that allows you to customize training to the specific needs of your company. Custom30 training is ideal for companies who have immediate training needs, who have the need to regularly train new employees, or who do not have the budget to purchase a standard onsite training class.

### HOW DOES IT WORK?

Purchase training credit hours, which are applied to webinar training in 30 minute increments up to 2 hours per session. Training credit hours never expire, and entitle you to include an unlimited number of participants in training sessions.

### TRAINING TOPICS

Select from our list of training webinars (see next page) or design your own Custom30 training by choosing the topics specific to your company's needs. Whether you are new to *PLC WorkShop for Siemens 505/CTI 2500* or an experienced user, Custom30 training will benefit anyone who writes, troubleshoots, or maintains 505 PLC programs for Simatic 505 or CTI 2500 Series PLCs.

#### Custom30 Training Benefits:

- Purchase only the training you need
- Tailor training content to your exact needs
- Protect your 505 PLC investment by fully utilizing PLC WorkShop

#### Custom30 Training Includes:

- ✓ Customized training, delivered via web conference
- ✓ Non-expiring training credits, to be used at any time
- ✓ Knowledgeable, experienced instructor
- ✓ Access to a video tutorial library (with Training Pack Purchase)

#### Video Tutorial Library

- 3-month online access included with 5-Hour Training Pack (\$750 value)
- 6-month online access included with 20-Hour Training Pack (\$1,500 value)
- 12-month online access included with 50-Hour Training Pack (\$3,000 value)
